#8

Care at Home costs per hour have reduced in 2020-21 and there is an increase in the percentage of older people (65+) in the Stirling area receiving their long-term care needs at home. This is in line with the HSCP vision ensuring the provision of care at home to meet the long term needs of people aged 65+ remains a priority. The outcome indicators (SW04) below are normally reported every 2 years from the Scottish Health and Care Experience Survey commissioned by the Scottish Government. The most current data is for 2019/20. The HSCP continues to focus on the development of care and support which will offer individuals, their families and carers more choice and control.
