ENV 02a: Net Cost of Waste Disposal per Premises

Expenditure on waste and recycling has risen significantly over the last year. The cost of Stirling Council's Waste Service is the highest in Scotland.

The Covid-19 Pandemic had a significant impact on the Councils Waste Services during 2020-2021. Operational pressures resulted in significant spend on contingency resources and the general behaviour of residents saw household waste arisings becoming higher than pre-pandemic levels which in turn resulted in higher than normal costs for waste collections and disposals. This is primarily attributed to people working from home and the restrictions on travel generating more waste.

A Short Life Working Group has been formed to review the way that the waste service is delivered in Stirling and this will address the cost of service provision
